Survival In the North Exercise

Hint: Do this exercise in groups of 2 or 3- each person needs to print a copy to submit for assessment

Names: _____

You and your group member are the only ones to survive a plane crash with out injury in the North-west Territory as a result of geese flying into the planes prop and causing it to crash. Your resources are the same as the ones they would have if you were there in the plane with them.

You are at least 8 walking days away from any civilization. The plane before it crashed went 400 miles off its course. Unfortunately the locator in the plane was destroyed in the crash. The time of year is the late fall but, you are not above the tree line but in a mountainous area of the northern Rockies. Much as the same as the video clip

Your goal is to write the scenario on how you survived in this scenario

Survival Description:

Use the back of the page if necessary to finish scenario.
